

LAKE WASHINGTON WASTEWATER LAKE LINE MANAGEMENT PLAN AND EIS

You're invited!

Join the EIS team for a virtual public meeting to learn more about the plan and the EIS process, comment and ask questions about the EIS!

- Tuesday, July 26, 6-7 p.m.
- Visit our online open house through August 5 at: engagingbellevue.com/lake-washington-line

Bellevue Utilities is developing a management plan for the repair, replacement and maintenance of the Lake Washington sewer lake lines, which include 14.6 miles of pipes along the lake's shore. The plan will help ensure the city can continue to provide safe and reliable wastewater service to the community and help us protect public health and the delicate Lake Washington ecosystem.

To understand the potential impacts of this plan on the environment, Bellevue Utilities will produce an environmental impact statement (EIS). The EIS team is currently determining the most important factors to study and wants your input.
